EDUCATION

UIET,PANJAB UNIVERSITY,Chandigarh

2022 – 2026

B.E. - Computer Science And Engineering (C.S.E.)- **CGPA - 8.23**

Chandigarh

WORK-EXPERIENCE

Infowiz Software Solutions

Chandigarh

Web Developer

May-2024 – July-2024

- During my internship at Infowiz Software Solutions, I developed dynamic and responsive web applications using the MERN stack.
- I gained practical experience in MongoDB, Express, React, and Node.js. This opportunity enhanced my skills in full-stack development and problem-solving.
- Learned the MERN stack comprehensively and continuously improved my development skills throughout the internship.

PROJECTS

WAVE-CHAT 🗄 | Next.JS, React, Socket.IO, Tailwind, Prisma, PostgreSQL

2024

- Developed a responsive wave-chat application similar to **Discord** using **Next.js**, **Prisma**, **PostgreSQL**, **React**, and **Tailwind CSS**.
- Implemented user authentication features for login and sign-up, using **CLERK** Authentication).
- Enabled users to create and manage servers, including the creation and deletion of audio, video, and text channels.
- Enabled comprehensive member management features, including invitations, sending messages, and editing or deleting messages, to enhance user interaction and community building.
- Developed a messaging system enabling users to send, edit, and delete messages seamlessly within channels, as well as facilitating one-to-one messaging and audio/video calls for enhanced communication.

Shopping-Cart 🗄 | ReactJS, ExpressJS, MongoDB, NodeJS, Firebase

2023

- Developed a full-fledged e-commerce app using the MERN stack with login and signup functionality.
- The app features a dynamic front-end and robust back-end for managing products, orders, and user accounts.
- Designed an admin dashboard to allow product creation and deletion, facilitating efficient administrative control over the product catalog. **LINK - Admin-Panel**
- Implemented responsive design to ensure a seamless user experience across various devices.

Real-Estate App 🗄 | ReactJS, ExpressJS, MongoDB, NodeJS, Firebase

2023

- Developed a comprehensive real estate app using the **MERN stack**, allowing users to rent or sell houses, featuring a smooth login and signup process.
- Integrated **Firebase authentication** to facilitate user login and signup, ensuring a secure and streamlined experience.
- Implemented a powerful search functionality, enabling easy discovery of properties based on user preferences.
- Created a platform for managing property listings, handling user authentication, and ensuring seamless data handling.

TECHNICAL SKILLS

Languages: C, C++, JavaScript **Technologies/Frameworks:** Next.JS, ReactJS, MongoDB, Express, NodeJS, Firebase, PostgreSQL, Prisma

CERTIFICATIONS

- Participated in Hack the Mountains hackathon, hosted by Marwari University, Gujarat- **Certificate**
- Mastering Data Structure and Algorithms - **PW-Skills**
- Web-Development - **Udemy**
